

# Life Is A Carnival by Moreno Solinas

## TECHNICAL RIDER

### GENERAL

The première of *Life Is A Carnival* took place on Thursday 6th September 2012 at The Place (Robin Howard Dance Theatre), in London. The piece was commissioned by The Place and Bloomberg for *The Place Prize 2012*.

Duration: 18 minutes.

*Life Is A Carnival* is a solo performance and travels with 1 technician and 1 rehearsal director. A dressing room will be provided by the organiser.

### STAGE

Minimum surface: 8m x 8m. Hight minimum: 4m. Any venue smaller than these minimal dimensions should be discussed with and approved by the artist.

A grey dance carpet covering the whole surface; and black back wall exposed. Alternatives can be discussed with the artist.

### SET & PROPS

The set for *Life Is A Carnival* consists of a wooden bench/plinth of about 170x50 cm. This is foldable and will travel as a piece of luggage with the artist.

During the performance a red flower (gladiolo) is used. 2 gladioli (one for the performance and one for the tech rehearsal) need to be sourced the day before the performance, for which the help of the venue would be useful.

A visual reference can be provided upon request.

### PLANNING

Before arrival if possible: grey dance carpet & rigging of lights.

Set-Up and rehearsal: minimum 4 hours for set-up and runs. If lights have not been rigged extra time should be allowed for set-up.

When possible there would be a separate studio for warm-up and rehearsals before the performance.

\*the schedule can be adapted to the specific need of each venue

After: a flower gets smashed as part of the performance therefore time for cleaning up needs to be taken into account for mixed bills.

### SOUND & LIGHTING

All sound is produced live by the performer.

For the lighting requirements please see the touring rig plan below.
